

I am writing to formally verify that I hold 100% of the creative and commercial rights to the audio and visual assets for my single, "Gravity Bends." I am the creator behind the brand Maximum Reality and the developer of the associated digital ecosystem.

Please see the following points of verification regarding my ownership:

- Musical Composition: I am the sole author of the lyrics and the primary producer of the track. The composition was developed as part of the Maximum Reality discography, and I maintain all master and publishing rights.
- Visual Assets: The cover art was created and curated by me using a multi-stage professional design workflow. While I utilize advanced digital tools, including AI-assisted generation, the final output is a result of my specific creative direction, iterative prompting, and manual post-production editing to align with my established brand aesthetic.

Proof of Identity & Platform: I manage the Maximum Reality YouTube channel and web domain (MaximumReality.xyz), where I regularly document my process of building code, games, and digital stories. This project is a cohesive part of my professional creative output.

I confirm that no third party holds any claim to this material and that I have the legal authority to distribute this work commercially via RouteNote.

Thank you for your time and for protecting the rights of independent creators.

Sincerely,

Lori Sifuentes

Digital Creator, Maximum Reality
